

REMARKS

This Amendment is submitted preliminary to the issuance of an Office Action in the present application.

Applicant has canceled original independent claim 1 in favor of new independent claim 6 which is intended to present claims in proper form and language and to better encompass the full scope and breadth of the invention. Claims 3 and 5 have been canceled and claims 2 and 4 have been amended to make them consistent with the submission of new claim 6 and to provide proper antecedent basis for all claimed elements. Claims 6, 2 and 4 correspond substantially to claims 1 to 3 as presented in the original International PCT application PCT/DE2004/002253.

In addition, applicant has amended the specification to present it with proper headings and to delete a reference to a particular claim number.

A substitute specification which includes all the foregoing changes to the specification (other than the claims) is enclosed herewith.

When the Examiner takes this application up for action, s/he is requested to take the foregoing into account.

Respectfully submitted,

By:
